EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claims 34-37, at line 1, change "system" to --method--.

In claim 39, at the last line, add an ending period.

The above changes are necessary for correction of minor inadvertent errors and to provide for proper antecedent basis.

2. The following is an examiner's statement of reasons for allowance: The use of a laser controller in combination with the claimed optical module of the instant invention for receiving a series of k electronic pulses from the multiplexer; and a laser light source receiving an input from the laser controller and sending a second laser light packet having a second set of k light pulses to the network is not being disclosed in the prior art; further added claims 38-44 recite inter alia a method comprising directing a beam of collimated light through a waveguide positioned at a multi-sided module towards n photoreceivers located at a side of a substrate contained in a cavity of the module; sending an output of the n photoreceivers to an integrated circuit; storing a second digitized packet received from the integrated circuit using k latches, where $k \geq 1$; and directing a second laser packet having k laser light pulses is also not anticipated or suggested by the prior art of record.
